

Vyopta Space Insights

Track room utilization Reduce inefficient usage Optimize ROI & Planning

Vyopta's Space Insights provides a single pane of glass into meeting space utilization, allowing you to identify inefficiencies, understand trends, and make the right technology choices. Take the guesswork out of your investment and make data-driven decisions to optimize your collaboration spaces for the hybrid workplace.

People

Discover how people are using the spaces and ensure their needs are met. Can employees always find a place to meet? Are schedules disrupted by no-show bookings or meeting collisions? How many ad hoc spaces do you need?

Space

Identify trends by building, floor, room type, location, etc. Optimize room size and real estate investments. Are large conference rooms rarely holding more than 4-5 people? Are certain floors reaching capacity? Are huddle spaces being used at a higher rate than conference rooms?

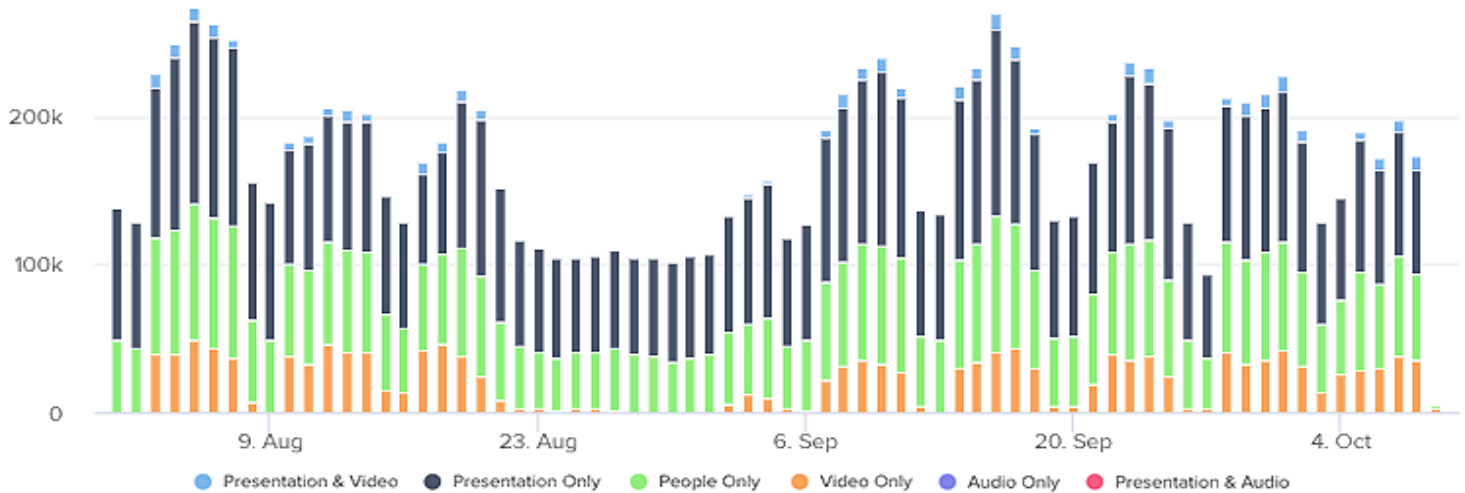

Technology

Understand how your technology investment is being used and where it could be optimized. Do employees have sufficient space to host their hybrid meetings? Are Webex rooms frequently dialing into Teams meetings (and vice versa).

- Are the rooms used for scheduled or ad-hoc meetings? In-person or hybrid meetings?
- Are any locations running out of meeting room capacity?
- What types of room technology should we invest in?
- Are rooms being filled to capacity?
- How often are meeting rooms occupied by a single person?
- Which recurring meetings frequently go unattended (ghost meetings)?
- Who are the meeting hosts of ghost meetings?
- How many scheduled meetings were missed?
- Is the deployed technology being used?

Vyopta Space Insights

How does it work?

With Space Insights, you can fully visualize and dissect the activity in your conference rooms and huddle spaces, empowering you to make data-driven decisions to increase the ROI on your real estate investment and improve workforce productivity. This is accomplished by combining three components of data into a single pane of glass, as displayed above.

- Room schedule (via O365/Exchange or Google Calendar)
- Meeting & call data (from all UC/UCaaS vendors)
- Occupancy & people count data (from supported room hardware)

Taken together, this data offers unparalleled visibility into the modern office space and provides the tools to ensure your investment is meeting the needs of the workforce. Space Insights keeps track of over 60 metrics, giving you accurate data down to the minute.

Schedule

- Scheduled meetings (counts and durations)
- Attended meetings (counts and durations)
- Missed meetings (counts and durations)
- Unscheduled Activity (counts and durations)

Technology

- Counts and durations of following activity types:
 - Unoccupied
 - In-person only
 - Audio / Video / Presentation used
- Activity as a percentage of total meeting time
- Hybrid meetings - Native vs Interop

People Count & Occupancy

- Real-time people count
- Occupancy detection
- Percentage of occupied capacity
- Single person "meetings"
- Ad hoc collaboration
